

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE  
Transcriber's Office  
FLOOR DEBATE

April 26, 2001      LB 398, 440

define a mail order ophthalmic provider means an entity who ships, mails or in any manner delivers dispensed contact lenses to Nebraska residents. Note that it doesn't say located outside the state of Nebraska. And yet, if you read the bill, you will see it's directed towards mail order houses that are located outside of the state of Nebraska. So, but the definition would include anybody who was in that business who...

SENATOR CUDABACK: Time.

SENATOR BEUTLER: ...was inside the state of Nebraska. So it needs clarification there as to whom...

SENATOR CUDABACK: Senator Beutler, time is up. Thank you. For discussion on the motion to return for specific amendment, Senator Suttle.

SENATOR SUTTLE: Thank you, Mr. President and members of the Legislature. I stand to oppose returning this...this bill at this time. A lot of the concerns that Senator Beutler talked about we did address in this. This bill makes it so that you can receive your prescription and economically this is better. Before this most people did what Senator Beutler does...did. They stayed where they were and got their contacts from where they had had their eye exam. This is somewhat...this is decidedly more expensive than being able to order contact lenses over the Internet or for any other reason. We, when this bill, LB 440, which is the number of the bill that was amended into LB 398, when this was first...first introduced, the Internet company wrote to all of its members in the state of Nebraska and said they're trying to keep you from ordering your contact lenses over the Internet. And those of us on the committee got mail like we'd never gotten before. This little innocuous...what we thought was a little innocuous bill that Senator Byars introduced suddenly became extremely uninnocuous, excuse me, that was a really bad pronunciation. So we started working with contact lens companies and Senator Byars started working with the optometrists, the ophthalmologists and the contact lens companies to work out a compromise that would be medically responsible and be economic for all concerned, but especially the patient. I found that they had worked it out.
